

Take better U1 photos.

Scan first. It checks blur, light, and resolution.

Scan to open

Before each photo

1

Wipe lens

Clean dust, rain, fingerprints.

2

Stand still

Hold with both hands. Tap subject.

3

Take 3 shots

Wide, medium, close-up.

The 3 photos we need

Wide

Full site, crew, equipment, surroundings.

Medium

Crew, materials, equipment, active work.

Close-up

Clean detail that explains the work.

Retake the photo if

It is blurry, too dark, or taken through a dirty window.

The subject is cut off, blocked, too close, or hard to understand.

It does not clearly show people, equipment, work, or finished result.
